

# Octojet 868

## Carbon black dispersion

CHEMICAL NAME: Furnace carbon black (1333-86-4)

PHYSICAL FORM: Aqueous anionic dispersion

PRODUCT SPECIFICATIONS		METHODS
Solids	49.0 – 51.0 %	SCC-040
pH	8.0 – 10.0	PHC-010

### PRODUCT DESCRIPTION:

Octojet 868 is a colloidal suspension of furnace carbon black in water, which can be added directly to most aqueous formulations. Octojet 868 is pebble-milled at 50% in water with sufficient dispersing aids to prevent particle re-agglomeration. This milling provides finely divided particles for maximum tinting strength.

Furnace carbon black has approval by the FDA for use under the following: CFR 21, Section 177.2600.

### STORAGE AND HANDLING:

Containers should be kept tightly closed. Contents should be stirred using mechanical agitation prior to use. Protect from freezing (32 deg. F.).

The information provided herein is believed to be reliable; however, no guarantees are made or liability assumed. Tiarco Chemical makes no claims or warranties concerning the suitability of the product for a particular use or purpose.
