Octotint 601 is a finely divided aqueous dispersion of rutile titanium dioxide pigment, at 70% activity. Titanium dioxide has the greatest hiding power, or opacifying power, of all pigments. It is also inert and noncombustible. Octotint 601 is formulated for direct addition into most latex-based compounds, thus providing the compounder with a ready to use pourable form of TiO₂ with improved dispersion properties.

Titanium dioxide has approval by the FDA for use under the following: CFR 21, Section 175.105, 175.300, 176.170, 177.2600, 178.3297
